

UAMS Nurses Share New Knowledge, Innovation and Improvements

Tara Lamm, BSN, RN — a UAMS Surgical Specialties Nurse and Infection Control Resource Nurse — developed a research poster addressing catheter-associated urinary tract infections (CAUTI), that she presented earlier this year at the 24th National Evidence-Based Practice Conference in Iowa.

UAMS is proud to recognize 36 nurses who have presented research, evidence-based practice projects and literature reviews locally, nationally and internationally this past year!

The presenters represent both inpatient and outpatient nurses from across UAMS – from frontline BSN nurses – to those in advance practice roles.

If you want a nursing career where nurses are valued and supported, consider UAMS Nursing.
